

What's new in PatBase?

• Custom display format updated

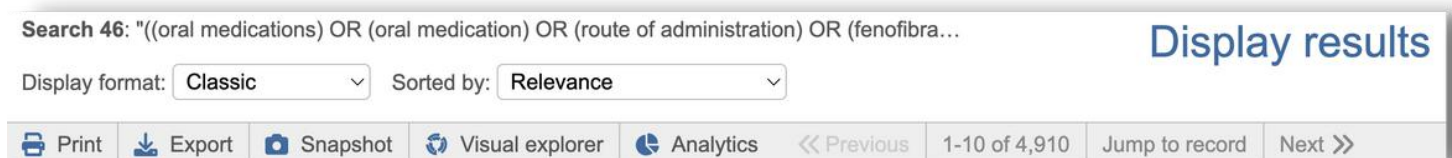

It is now quicker for users to select fields they want to include in a Custom Display Format. Fields are listed in a selection box and grouped under sub-headings to make them easier to find.

The screenshot shows a user interface for selecting fields for a custom display format. It is divided into two main panels: 'Available Fields - Showing 25' on the left and 'Selected Fields - Showing 7' on the right. Both panels have a 'Filter' input box at the top. The 'Available Fields' panel lists fields under several sub-headings: 'General' (Family information, Priority information, Designated states), 'Parties' (Probable Assignee, Patent assignee (standard), Patent assignee (non-standard), Inventor (standard), Inventor (non-standard), Agents), 'Text' (Single publication claims, Single publication description, 1st main claim, Keyword in context (KWIC)), 'Citations' (Backward Citations, Forward Citations, Number of Backward Citations, Number of Forward Citations), and 'Classifications'. The 'Selected Fields' panel shows a list of selected fields: Image, Title, Abstract, FDA, SEP, Mosaic, and Legal Status. Between the two panels are several control buttons: a right arrow (>), a left arrow (<), a button with a list icon and a right arrow (≡ >), a button with a left arrow and a list icon (< ≡), an up arrow (^), and a down arrow (v).

Fields can also be filtered using the search box. Double click on a field or use the right arrow button to add fields. Similarly, double click on a field or use the left arrow button to remove fields. Users can also now choose the order of display. Use the "Up" and "Down" arrow buttons to rearrange the order of selected fields.

- **New results header and "Jump to Record" feature**

The results header now has a more modern look & feel. A new "Jump to Record" feature has been added making it significantly quicker to navigate large result sets.

Simply enter a record number and press enter to jump to a particular record. In View mode, this option is available in the results header. In Browse mode, this option is available in the top left-hand corner within "Show Options".

• Enhanced Export Wizard

Family / Publication information has now been grouped together for more efficiency, with an option to "Select All" or choose individual fields.

The screenshot displays the 'Enhanced Export Wizard' interface. At the top, it says 'Export by' with a help icon, followed by two radio buttons: 'Family' (selected) and 'Publication'. Below this, the text reads 'Family Export - Please select fields to export'. The interface is divided into two main sections: 'Available fields - showing 64' on the left and 'Selected fields - showing 0' on the right. The 'Available fields' section has a 'Filter' input box at the top. Below it, fields are grouped under 'Family Information' and 'Numbers and Dates'. Under 'Family Information', there is a 'Select All' option and a list of fields: 'Patent Number' (highlighted), 'Publication Date', 'Application Number', 'Application Date', and 'Country Code'. Under 'Numbers and Dates', there is a list of fields: 'Priority information', 'Master Patent Number', 'Earliest Priority Date', 'Earliest Publication Date', 'Extended Family Number', 'Earliest Priority Country', 'Original Patent Number', 'Original Application Number', 'DOCDB Patent Number', and 'DOCDB Application Number'. Between the two sections are six buttons: a right arrow, a left arrow, a list icon with a right arrow, a left arrow with a list icon, an up arrow, and a down arrow. The 'Selected fields' section also has a 'Filter' input box and is currently empty.

A new field separator option for CSV exports has been added. Select from comma, semicolon, and tab.

• Full Text Viewer updated

Navigate the Full Text Viewer more efficiently. The displayed publication is now highlighted on the left hand side with a blue border.

The screenshot displays the 'Full text view' interface. On the left, a list of publications is shown, with 'CA2775248 C - Claims' selected and highlighted with a blue border. The central area shows the full text of the selected publication, with terms like 'oral medications' highlighted in yellow. The right side features a 'Hit Map' showing the distribution of these terms across the document.

CA2775248 C - Claims

Translate textmine Summarise Compare

THE EMBODIMENTS OF THE INVENTION FOR WHICH AN EXCLUSIVE PROPERTY OR PRIVILEGE IS CLAIMED ARE DEFINED AS FOLLOWS:

1. A method of discharging a plurality of oral medications from a packaging having a body with a plurality of compartments for holding the oral medications and a cover attached to the body along a surface of the body for confining the oral medications in the compartments, the method comprising: receiving the packaging in a carton containing additional packagings containing the same oral medications; at least partially detaching the cover from the body to access a separate opening to each of the compartments; and in response to at least partially detaching the cover from the body, removing all of the oral medications from the compartments to empty the packaging, wherein the packagings are each labeled with a time of day relating to a medication pass, and the packagings are each containing all of the oral medications that a patient needs to take at the time of day labeled on the corresponding packaging, such that the step of removing all of the oral medications from the compartments provides all of the oral medications that the patient is instructed to take at the time of day labeled on the corresponding packaging, and wherein the cover and the surface of the body are each free of score lines, lines of weakening and perforated seams such that the step of at least partially detaching the cover from the body does not include severing one or more of the compartments from a remainder of the plurality of compartments at the packaging.
2. The method of claim 1 wherein the cover is at least partially detached from the body intact as a single piece.
3. The method of claim 1 wherein each of the compartments holds a single unit dose of one of the oral medications.
4. The method of claim 1 further comprising: receiving instructions to not administer one or more of the oral medications to a patient. 23
5. The method of claim 1 wherein at least partially detaching the cover from the body to access the separate opening to each of the compartments further comprises: lifting a portion of the cover at a corner of the body to define a corner pull tab; and applying a manual force to the cover using the corner pull tab in a manner effective to peel the cover from the body and reveal the opening to each of the compartments.
6. The method of claim 5 wherein the corner pull tab is grasped using one or more fingers of one hand, and further comprising: grasping the body of the packaging with the opposite hand.
7. The method of claim 1 wherein at least partially detaching the cover from the body to access the opening to each of the compartments comprises: removing the cover from the body.
8. The method of claim 1 wherein the compartments are organized as a series of wedge-shaped cavities extending radially outwardly in a circular arrangement from a central region defined by the surface of the body, and the compartments being separated by strips defined by the surface of the body, the strips each extending between the central region and a shoulder defined by the surface of the body and surrounding the plurality of compartments.
9. The method of claim 8 further comprising: in response to removing all of the oral medications from the compartments to empty the packaging, disposing of the packaging which is non-reusable. 24
