PatBase Enhancements October 2011

Minesoft and RWS Group are pleased to bring you a new release of PatBase this Autumn. Read on to find out about the new enhancements, many of which are the result of valuable feedback from our users.

We are also delighted to announce that Minesoft is celebrating its 15th Year Anniversary this year. We would like to thank all our clients and partners for their fantastic support since we started out in September 1996. We look forward to working with you for many years to come.

Summary Table of Enhancements

<i>Enhancement</i>	<i>Page</i>
New Data Coverage	2
New Field Qualifiers and Commands	3
Analysis Enhancements	4-5
New Folder Shortcuts	5
Custom User Field improvement	6
Search Machine Translated Full Text for Japan & China	7
New Hits View	8
Enhancements to Alerts	9

Discover the world of patents

NEW Data Coverage in PatBase

We are pleased to highlight the following Coverage enhancements, all added to PatBase in the last 12 months with the aim of giving you access to the most comprehensive patent data in a single database.

Recently added data

- Full-text for Scandinavia and other European countries (Denmark, Finland, Sweden, Belgium, Switzerland and Spain)
- Full-text for Indian applications
- Japanese citations
- Taiwanese non-Latin Titles, Abstracts, Patent Assignees and Inventors.
- Chinese Full Text and Machine Translations of Full- Text
- Japanese Machine Translations of Full-Text
- DOCDB new states added: Georgia, Hungary, Republic of Serbia, Colombia
- German Machine Translations of Full Text
- French Machine Translations of Full-Text
- Full-Text and Biblio for Indian grants

Current projects

We are currently in the process of adding:

- Brazilian Full Text
- Further Taiwanese non-Latin Full-Text additions - 2009 and 2010
- Australian Full Text

NEW Field Qualifiers and Commands

Same document field qualifiers

The following commands allow you to limit your keyword searches to within the same publication. This means that when you search two terms using 'and' or 'not', the keywords will need to be present in at least one full text within the family, allowing you to narrow your search if required.

List of available 'same document' commands:

<i>Command</i>	<i>Description</i>	<i>Example</i>
SFT	search within the Full Text of the same publication within a family	SFT=(vacuum and cyclon*)
SCL	search within the Claims of the same publication within a family	(SCL=(boot) not (ski* or snow))
SCLCC	search within the Claims of the same publication within a family for a specified country	SCLUS=(drink or beverage)
SDSC	search within the Descriptions of the same publication within a family	SDSC= (golf and ball)
SFTCC	search within the Full Text of the same publication within a family for a specified country	SFTEP=(laser and imprint)
STA	search within the Title & Abstract of the same publication within a family	(STA=(staple*) not (surgery or surgical))
STAC	search within the Title, Abstract & Claims of the same publication within a family	STAC=(ski and boot)

Same paragraph field qualifier: SP=

This allows your search to be limited to within the same Paragraph of the same publication within a family. E.g. ((SP=(plastic or metal)) not wood)

NB: depending on the quality of the Full Text from the original source, paragraph delimiters may not always be precise.

Competitive intelligence in your industry

Visual Explorer comes to PatBase

The dynamic Clustering and Visualisation tool – Visual Explorer – is now available in PatBase. Identify trends in keyword, assignees and IPCs with a choice of interactive visualisations that break down the data in a clear, pictorial way.

Once you click on a cluster of interest to browse through relevant records, you can add all records from that cluster to your search history to re-analyse or to add to a folder.

Look out for the Visual Explorer icon at the top of the search results page, or access it directly from your search history page under the 'more' options.

Keyword Visualisation in Visual Explorer

New fields added to Snapshot

The Snapshot analysis tool now offers a breakdown of Keywords and Citations from your results set. View a Citations timeline graph to see the citations history, or choose to view the most frequently occurring Keyword terms with the integrated Visualisation options.

Citations Timeline graph in Snapshot

Folder Shortcuts

You can now have up to 5 default folders available via shortcuts at one time during a search session allowing you to assign a record to multiple folders with just one click.

This new feature enables you to use folders to assign records by feature, project or any other relevant tags that relate to the current search. Folders can be new, existing or even shared folders set up under your User ID. Records already present in the folder will be checked. To watch the short video showing how they work please [click here](#).

Custom User Fields: New option to bulk-classify records

PatBase account Administrators can set up internal Custom User Fields in their Settings to apply company-specific criteria to PatBase records e.g. product categories, invention descriptors, estimated expiry date or comments. Users (depending on access rights granted by administrators) can view and assign values to these fields, which can be searched together with standard PatBase fields, using the Custom User Fields search form.

This new time-saving feature allows PatBase administrators to assign up to 250 records from a results set to a particular field in bulk.

Go to 'more' on the search history page and 'assign custom user fields' to tag all the records from that search.

The screenshot shows the PatBase web interface. At the top left is the PatBase logo. At the top right, it displays 'Username: [redacted]' and 'Subaccount: none'. Below this is a navigation bar with 'Menu', 'Search', 'History', 'Session', 'Folder', 'Order', 'Help', and 'Logoff'. The main content area features a table with the following data:

#	Search query	Results	Options
1	(TAC=(cranes))	23	View Browse Hits Optimise more...

To the right of the table is a sidebar with 'Information' and 'Shortcuts' tabs. Under the 'Shortcuts' tab, there is a section titled '1: More options' containing a list of actions: 'Statistical analysis', 'Show Snapshot', 'Visual explorer', 'Export search results', 'Save search', 'Add to results folder', 'Order documents', 'Assign Custom User Fields', 'Set as a search filter', 'Create alert', and 'Cancel'. A callout bubble points to the 'Assign Custom User Fields' link in this list.

Assign custom user fields to all records from a search step

For more information about or assistance with Custom User Fields, please contact the Helpdesk on +44(0)20 8404 0655 or support@minesoft.com

Search Machine Translated Full Text

Machine translated Full Text has now been added for China and Japan allowing you to search the text using English keywords.

Use the non-Latin search form to search (in English) the machine translated Full Text – enabling you to pick up important Asian records you may otherwise miss.

Title: 一种潜水辅助器以及具有潜水辅助器的潜水衣

Abstract: 一种潜水辅助器以及具有潜水辅助器的潜水衣。该潜水辅助器为具有喇叭形开口的袋状体，易于安装在潜水者袖口的手腕、腿部，且可安装于潜水衣的衣袋。喇叭形袋状体具有潜水辅助器的潜水衣。本发明公开的潜水辅助器在水平运动时，如开口朝前则阻力小，如开口朝前由于片体充水展开，则阻力大。而利用了该潜水辅助器的潜水衣，结合潜水者划水时动作特点，保证在手臂、腿部划水时潜水辅助器充水展开提供较大阻力，而在手臂、腿部划水时潜水辅助器合拢减小阻力，在保证不增加前进阻力的前提下对潜水者每次划水动作得到更大、更有力向前推力，极大提高了游泳速度。

Claim(s):

CN 1. 一种潜水辅助器，易于安装在潜水者袖口的手腕、腿部，其特征在于：该潜水辅助器为具有喇叭形开口袋状体。

2. 根据权利要求 1 所述的潜水辅助器，其特征在于：所述的潜水辅助器由两片软质片材制成，两片软质片材周缘连接。

3. 根据权利要求 2 所述的潜水辅助器，其特征在于：所述的两片软质片材为一组于固定于潜水衣上的基片（1）以及附着于基片上的片体（2），片体上设置褶皱（21）。

4. 根据权利要求 3 所述的潜水辅助器，其特征在于：所述的褶皱（21）设于片体两侧且凹陷于片体中，形成利于牵引水流的槽道。

5. 一种具有潜水辅助器的潜水衣，包括具有衣袖、裤管的衣体，其特征在于：所述的潜水辅助器为具有喇叭形开口的袋状体，潜水辅助器固定于衣袖小臂或裤管处，且潜水辅助器开口方向与身体划水方向相背离。

One kind of diving aids and aids with the diving suit diving

One kind of diving aids and aids for diving with diving suits, diving aids to the opening of the pocket in body, for mounting the water in the diver's arms, legs, and can be installed in a diving suit of the sleeve parts at the formation of the diving suit diving aids. Present invention aids in the water diving exerts the open back then suffered a small resistance, such as the opening film forward is due to open water body, suffered great resistance. The use of the diving suit diving aids, combined with the water when moves, and guaranteeing the arm, leg aids the water when diving open water-filled to provide a great resistance in the arm, leg retraction when diving aids fold decrease resistance in advance to ensure the resistance does not increase under the premise of the water when the diver moves each time to get and more powerful thrust before, greatly increasing swimming speed.

CN 1. one kind of diving aids, for mounting the water in the diver's arms, legs, characterized in that: the aids to the body with a flared opening of the pocket.

2. according to claim 1 diving aids, characterized in that: diving aids described by the two soft sheet of two materials around the local connection.

3. according to claim 2 to the diving aids, characterized in that: the two described as a soft sheet five diving suit for the substrate (1) and attached to the chip substrate body (2), set on a wrinkled piece of

4. according to claim 3 above diving aids, characterized in that: folds described (21) located on both sides of the body and depression in the film piece body, help guide the formation of the flow grooves.

In-depth scientific and technical research

'Hits' View

The new 'Hits' display format allows you to view Full Text records ordered by the publications that retrieve the most hits for a given keyword search or highlighting scheme.

This will enable you to browse through results at a faster rate, one family at a time, with the most relevant publications appearing first to scan through section by section with the aid of the hit analysis and keyword visualisation circle.

This new display format is very useful for scanning results to find Keywords in Context.

The screenshot shows the PatBase interface for a search of "(TAC=(space shuttle))". The search results are displayed in 'Hits' format, sorted by Relevance. The main feature is a 'Hit analysis' wheel and a list of publications.

Hit analysis wheel: A circular chart showing the distribution of hits across different sections of the patent documents. The central circle is labeled 'Claims (12)'. The outer ring is divided into segments for different sections: TITLE/ABSTRACT (14), DESCRIPTION (12), CLAIMS (12), and DESCRIPTION (12). The segments are color-coded: blue for TITLE/ABSTRACT, purple for DESCRIPTION, red for CLAIMS, and green for DESCRIPTION. The total number of hits for each section is shown in parentheses next to the section name.

Publications list: A table showing the publications and their hit counts for each section.

Publication	CLAIMS (12)	DESCRIPTION (12)	TITLE/ABSTRACT (14)	DESCRIPTION (12)
EP1460048A (Title/Abstract)	6	6		
EP1460048A (Claims)	6	6		
EP1460048A (Description)	6	6		

Legend: SPACE (yellow), SHUTTLE (green).

Browse through the most relevant families one by one aided by Keyword Visualisation Wheel and Hit Analysis

Go to 'Hits' next to 'Browse' on the search history page to open the Hit View, or switch to Hits from the display format dropdown on the search results page.

Cutting edge technology solutions

Enhancements to Alerts

Option to not receive alert emails with zero results

If you would rather only be alerted when your alert has returned some results, you can now choose to opt not to receive alert emails with 0 results, by going to the Alert Management screen.

Option to add an email header to alert emails

PatBase Alert owners can choose to add text (a comment/note) to alert emails – an ideal way to communicate important information to alert recipients. Each alert can have its own header. Add your comment when you create your alert – or to add text to an existing alert, go to the Edit page

The screenshot shows the 'Add new alert' form in the PatBase interface. A callout bubble highlights the 'Email to:' field and the checkbox 'Do not send email when alert returns zero results.'. The form includes the following fields and options:

- Alert name: [Text input]
- Alert query: [Text input]
- Email to: [Text input] (Separate multiple email addresses with a semi colon)
- Do not send email when alert returns zero results.
- Text to include in alert email: [Text input]
- Email to: [Text input] (Separate multiple email addresses with a semi colon)
- Do not send email when alert returns zero results.
- Text to include in alert email: [Text input]
- Alert frequency: Weekly Monthly
- Display format: **Classic** (dropdown)
- Alert options: New families only
 New families and when new publications are added
- Show advanced options
- When first IPC is added to the family
- When first assignee is added to the family
- When first English abstract is added to the family
- When first assignee or IPC or abstract is added to the family (all of the above)

Buttons: **Create alert** (orange), **Clear** (grey)

Footer: Command line: [Text input] Search | Command line (expand) | Minimize command line

PatBase is developed in partnership by **minesoft & RWS GROUP**

Add your note when creating or editing a PatBase alert

If you have any feedback or questions about these enhancements, please do not hesitate to contact our Helpdesk on +44(0)208 404 0652 or support@minesoft.com.

Take the hassle out of monitoring patent applications!

PatentTracker - family and legal alerts from Minesoft

The professional online patent monitoring service that has been tracking patent registers and INPADOC for world renowned companies and patent attorneys since 2001.

- Watches any INPADOC Family + Legal Status, covering over 75 countries
- Highly cost-effective INPADOC Multi-Tracker Alert option - triggers automatic monitoring of corresponding register including EP, US, GB, DE and CA Office Registers.
- Monitor a range of single registers
- Weekly/monthly email Alerts - you are notified only if there is a change to report
- Easy to use, with in-built management features
- Track patent applications up to grant and beyond!
- Developed for patent specialists
